

\* gray background = functionality implemented

\* green background = functionality in work

Pri	Id	Story	Story Points	Task Hours	Release	Sprint
1	3	As a site user, I need to self register so that I can login to the system.	8	16	0.6 Beta 1	Sprint 1
2	1	As a site user, I need to login to the system to gain access to my project.	5	6	0.6 Beta 1	Sprint 1
3	47	As a site administrator, I need for the site users to be able to logout so that security of their accounts is maintained.	2	4	0.6 Beta 1	Sprint 1
4	4	As a product owner, I need to create a product in order to begin the product development process.	5	10	0.6 Beta 1	Sprint 1
5	7	As a team member, I need to create a user story so that product features may be identified and tracked.	5	16	0.6.2	Sprint 2
6	6	As a team member, I need to estimate a user story in story points so that a pure measure of size is identified.	2	2	0.6.2	Sprint 2
7	46	As a product owner, I want the story point estimate scale to be 0, 1, 2, 3, 5, 8, 13, 20, 40, and 100 because estimates contain a fair amount of error that is only relevant to these numbers.	1	5	0.6.2	Sprint 2
8	52	As a product owner, I want to create a release so that the product will have a release cycle.	5	8	0.6.2	Sprint 2

9	21	As a product owner, I want to create a date for a release to be complete so that all stakeholders will be aware of the completion date.	2	3	0.6.2	Sprint 2
10	20	As a product owner, I want to assign user stories to a release so that all stakeholders know what to expect for a release.	8		0.6.3	Sprint 3
13	16	As a product owner, I want to create a scrum team so that they may participate in the sprints.	8		0.6.3	Sprint 3
14	17	As a product owner, I want to establish an initial velocity for a scrum team so that velocity-driven release planning and velocity-driven sprint planning can be accomplished.	1		0.6.3	Sprint 3
16	9	As a product owner, I want to create user-valued themes so that I may associate relevant stories.	5		0.6.4	Sprint 4
17	54	As a product owner, I need to assign stories to themes so that a high-level product view can be attained.	5		0.6.4	Sprint 4
18	53	As a product owner, I need to create a sprint within a release so that stories may be assigned to it.	5		0.6.4	Sprint 4
19	15	As a product owner, I want to define a standard sprint duration so that sprints will have a consistent flow.	2		0.6.x	
19	23	As a product owner, I want to assign user stories to a sprint so that all stakeholders will know what to expect for a sprint.	5		0.6.x	
19	24	As a product owner, I want to create a sprint goal so that all stakeholders will have a general idea of what to expect in the sprint.	2		0.6.x	

19	25	As a product owner, I want to set a target velocity to a sprint so that stories may be allocated appropriately for the sprint.	2	0.6.x
20	26	As a scrum team member, I want to break-down sprint user stories into tasks so that ideal hours may be applied to the story.	13	0.6.x
21	19	As a product owner, I want to document the conditions of satisfaction during release planning so that a successful release is more likely.	5	
30	14	As a product owner, I want my team members to be able to re-estimate stories that are not currently assigned to an active sprint so that release planning changes may be accommodated.	3	
30	13	As a product owner, I want to re-prioritize incomplete stories that are not currently assigned to an active sprint so that release planning changes may be accommodated.	3	
30	33	As a product owner, I need a sprint kick-off step so that all stakeholders are aware of the official start of the sprint.	3	
30	31	As a product owner, I need a release kick-off step so that all stakeholders are aware of the official start of the release.	5	
30	36	As a scrum master, I must have a daily scrum to remove impediments from scrum team members and to keep other stakeholders informed of the team's progress.	8	
32	37	As a scrum team member, I want a task board so that I may easily follow the progress of tasks that I need to do.	20	
36	27	As a product owner, I want the system to restrict a sprint from starting unless all user stories of a sprint have been broken down into at least one task so that story break-downs are enforced.	5	

40	40	As a product owner, I need a release completion step so that all stakeholders are aware of the official end of the release.	3	
40	38	As a product owner, I need a sprint completion step so that all stakeholders are aware of the official end of the sprint.	5	
40	12	As a product owner, I want to allow themes or stories to be prioritized based on relative weighting so that the desirability of the feature is known before implementation.	20	
50	42	As a stakeholder, I need a release burn-down chart so that I may monitor the progress of the release plan.	5	
50	32	As a team member, I need to know when the release kick-off occurs so that I am aware that new tasks are coming my way.	5	
50	43	As a stakeholder, I need a sprint burn-down chart so that I may monitor the progress of the sprint plan.	5	
50	34	As a team member, I need to know when the sprint kick-off occurs so that I am aware that new tasks are coming my way.	3	
60	5	As a product owner, I need to edit the product information in order to accommodate product changes from the stakeholders.	5	8
64	35	As a scrum master, I need to know when the sprint kick-off occurs so that I may inform the scrum team of the daily scrum schedule.	2	
70	22	As a product owner, I want the system to automatically determine if all assigned stories may be completed for a given release so that the conditions of success may be quickly reevaluated with stakeholders.	8	

72	2	As a site administrator, I need to remove a user to prevent access that is no longer valid.	3
75	39	As a product owner, I need a sprint review meeting so that all stakeholders may learn from the previous sprint.	5
80	41	As a product owner, I need a release review meeting so that all stakeholders may learn from the previous release.	5
88	45	As a product owner, I need a read-only view of the task board so that I may monitor the progress of the scrum team.	2
99	11	As a product owner, I want my customers to provide questionnaire feedback for stories or themes so that the desirability of the feature is known before implementation.	20
100	44	As a stakeholder, I need a parking-lot chart so that I may monitor the progress of the product functionality.	5
150	8	As a product owner, I want my team to participate in Planning Poker so that the most accurate story estimate is achieved.	40
200	30	As a product owner, I want a scrum-of-scrum planning tool so that I have a better perspective on managing concurrent story implementations.	40
200	29	As a product owner, I want a planning buffer tool so that I may have a better perspective on risks associated with date-fixed or feature-fixed releases.	20
200	28	As a product owner, I want to control the maximum task size in ideal hours to enforce the adequate break-down of stories.	5

200	10	As a product owner, I want to prioritize themes according to financial value, development cost, new knowledge, and risk so that stories can be prioritized according to business value.	8
200	18	As a product owner, I want a velocity estimation tool so that velocity estimates are more accurate.	20
300	58	As a product owner, I want an option to create a story that links to a bug repository system so that the scrum team does not need to deal with keeping the two separate systems in sync.	
300	57	As a product owner, I want stories to allow uploaded content to be attached so that images, documents, or other artifacts may be associated.	
300	56	As a site administrator, I would like for my users to login via active directory authentication so that my windows user's have single sign-on.	13
300	55	As a site administrator, I would like for my users to login via open id or by username/password so that all of my user's needs are met.	13
